El plan de Toffee con el método de Víctor Heras

Estudié a fondo los 4 videos de Víctor Heras que me mandaste: la entrevista, la mentoría de 61 minutos, la clase de ganchos y la de cómo subir un reel. Con eso, y con los 29 videos que ya habíamos analizado, armé un plan nuevo desde cero, del 22 de octubre al 13 de noviembre, hecho para vender y para crear comunidad alrededor de Toffee y Galleta.

- 2 videos al día
- 20 principales + 23 cortos + 3 re-ediciones
- Palabra clave en cada video
- Historias 5 + 3 cada jueves

Cuántos videos subir al día

12:30

1 corto

Una sola toma de 8 s, sin texto, con gancho visual. Es para probar ganchos y traer gente nueva. Barato: 12 créditos.

7:30 PM

1 principal

3 tomas, unos 24 s, con la voz de Toffee, una idea ganadora y su palabra clave. Este es el que vende.

DOMINGOS

Re-edición

El principal que mejor funcionó en la semana, con otro gancho. No gastas créditos.

Víctor recomienda 4 o 5 videos buenos por semana antes que muchos malos. Nosotros tenemos 23 días hasta el 13 de noviembre y una cuenta nueva, así que vamos con un principal cada día (con el método completo) y un corto que cuesta poco y nos dice qué gancho funciona. Los tres subidos igual en TikTok, Instagram Reels y YouTube Shorts.

Lo que dicen tus números (22 oct)

YouTube: P1, la pólvora, es tu mejor video
Más de 1.300 vistas, más de 20 likes y un comentario con CALMA. El tema de la pólvora y

TikTok: Toffee solo gusta y retiene más
Toffee en la mesa: 30 likes en 511 vistas. Toffee moviendo la cabecita: 8,6 s de tiempo

las orejeras sí atrae compradores. Por eso el plan pone un video de CALMA cada 2 o 3 días y la re-edición P1b el domingo 25.

El primer segundo manda

P1 perdía a la gente en el primer segundo porque arrancaba con una oreja borrosa. Todas las primeras tomas piden ahora la cara clara desde el cuadro 1.

Fechas que mandan

La tienda promete 10 a 25 días hábiles. Los videos de Navidad (ÁRBOL y TRINEO) van todos antes del 13 de noviembre. Las orejeras se siguen vendiendo para el 24 y el 31 de diciembre (pedir hasta el ~18 y el ~24 de noviembre).

promedio. Por eso los cortos son de Toffee, sin voz y sin texto, como los virales de gatos que estudiamos.

Dos tipos de video, dos trabajos

Corto de las 12:30: sin voz ni texto, para alcance en cualquier país. Principal de las 7:30 pm: con la voz de Toffee y su palabra clave, para vender y crear comunidad (método Víctor: gancho, contexto, enseñanza, llamado).

Responde cada CALMA el mismo día

En TikTok, Instagram y YouTube. Pregunta de qué país es y dale soytoffee.store.

Hoy, 22 de octubre: P2

"Toffee, ¿qué siente un perro con la pólvora?". La pólvora es tu mejor tema en YouTube, así que arrancamos con ella. Hoy va un solo video (el corto C1 es opcional si terminas rápido). Genera las 3 tomas y el audio de la voz, mándamelos y te lo devuelvo listo. Ya publicados y fuera del plan: P1 (Galleta y las orejeras) y Toffee moviendo la cabecita.

La voz de Toffee en ElevenLabs

Solo habla Toffee

Una sola voz para todo. Lo que pregunta el micrófono va como texto en pantalla, y lo que diría Galleta lo cuenta Toffee.

Ajustes

Texto a voz · voz de Toffee · modelo Eleven v3 (o Multilingual v2) · estabilidad cerca de 40 %. Genera 2 o 3 veces y mándame la mejor en MP3.

Duración

Los cortos no llevan voz

Cada guion cabe en su video (30 a 42 palabras para 20 a 24 segundos). Los "..." son pausas de Toffee: déjalos.

Un solo mes de plan
Si pagas un mes y cancelas, los audios que generaste los puedes seguir usando para siempre. Genera todos los guiones de la página ese mes y descárgalos.

Son los que viajan a cualquier país. Solo música o sonido.

Lo que aprendí de Víctor Heras, aplicado a Toffee

Atención → nutrición → venta
El video corto no vende: consigue atención y seguidores. Se nutre en historias y se vende en mensajes. Por eso cada video termina en una palabra para comentar y Toffee responde con el enlace por mensaje.

Contenido para el seguidor ideal, no para el cliente
Si el video le habla solo al que tiene un perro con miedo, le gusta a 2 de cada 100 y el algoritmo lo frena. Si le habla a todo el que ama a las mascotas, le gusta a 50. Toffee habla de mascotas en general y al final lleva al producto.

El ratio de interés manda
Instagram y TikTok muestran el video a 1.000 personas, luego a 10.000, a 100.000 y a un millón, según cuántos lo ven completo. Gana el video que la gente no suelta.

La idea pesa más que el gancho y la edición
Una idea ganadora con mala grabación se viraliza; una idea mala bien editada no. Por eso empezamos por las ideas.

100 preguntas → filtro 550 → 20 ideas
Se escriben 100 preguntas comunes de la gente (no de expertos). Se quedan las que pasan el filtro 550: las entiende un niño de 5 años y le interesan a 50 de cada 100 personas. Luego se revisan con el checklist de la idea ganadora.

Checklist de la idea ganadora
Contracorriente, pasa el filtro 550, es única, le sirve a gente común, es polémica, tiene el formato adecuado, la cuenta un personaje congruente y ya funcionó en otra cuenta. Mientras más cumpla, mejor.

Guion de 4 partes
Gancho (4-7 s) → contexto → enseñanza → llamado con palabra clave. Así están escritos los 24 videos principales.

Una idea, varios formatos
Cada idea ganadora se graba en 2 o 3 formatos (personajes, entrevista con micrófono a 0,5x, vlog, dato). Si una funciona, se repite en otro formato.

El 80 % no funciona, y está bien
Se duplica lo que funciona. Ramón (casi 400 mil seguidores) sube 4 videos a la semana y uno de ellos es un video viejo que funcionó, re-editado con otro gancho.

Cada reel lleva palabra clave
Siempre. Trae comentarios (que empujan el video) y conversaciones por mensaje (que venden).

Historias 5 + 3, una vez por semana
Cinco historias con un llamado en la última y luego tres más con otro llamado. Es la secuencia de ventas para los que ya te siguen.

Marca con un deseo y un personaje congruente
La marca vende un deseo (aquí: una casa feliz y tranquila con tu mascota) y el personaje vive lo que vende. Toffee duerme en sus camas y Galleta usa sus orejeras.

La marca Toffee

Deseo
Una casa feliz y tranquila con tu mascota

Seguidor
Cualquier persona que ama a los perros y los gatos (el 90 % que nunca había pensado en comprar nada)

Cliente
El dueño de perro que sufre con la pólvora, el de gato que no usa su cama, el que quiere a su perro en la foto de Navidad

Congruencia
Toffee duerme 14 horas en las camas que vende y Galleta, rescatado de la calle una noche de pólvora, usa las orejeras. Toffee es lo que vende.

Comunidad
Palabra FONDO en los videos de marca: quien comenta recibe fondos de pantalla de Toffee y Galleta. Así entra a la conversación y se vuelve comunidad.

Las palabras clave

Cada video termina con una. Quien comenta, recibe la respuesta de Toffee en el comentario y, en Instagram, también por mensaje. FONDO es para los videos de comunidad: regala fondos de pantalla de Toffee y Galleta (yo te los hago) y abre la conversación.

PALABRA	QUÉ LLEVA	RESPUESTA DE TOFFEE

Los 5 ganchos que usamos

Brecha de curiosidad

Prometes algo y no lo dices al principio.

"Tu perro te sigue al baño por una razón que nadie te dice."

Contracorriente

Dices lo contrario de lo que todos creen y lo explicas.

"Tu perro no le tiene miedo a la pólvora."

Gancho visual

Algo inesperado en el segundo 1: un golpe, un zoom, algo fuera de lugar.

La pata de Toffee frena el plato de uvas justo frente a la cámara.

Efecto cotilla

Te cuelgas de algo que todos conocen: un tema del momento, una fecha, un lugar.

"El tema que divide a Colombia cada diciembre: ¿prohibir la pólvora?"

Personaje congruente

La prueba es ver a Toffee y a Galleta viviéndolo.

"Dicen que perros y gatos se odian. Nosotros dormimos juntos."

De 100 preguntas a 12 ideas ganadoras

Primero las 100 preguntas comunes de la gente con mascotas. Luego el filtro 550 y el checklist. Quedaron 12 ideas, cada una en 2 formatos. En el calendario van 20 (P1 ya se publicó); P8, P16 y P22 quedan de reserva para cuando un video falle o sobre un día.

IDEA	PREGUNTA	LLEVA A	POR QUÉ GANA	VIDEOS
A	¿Por qué mi perro tiembla con la pólvora?	Orejeras	Pasa el filtro 550: lo entiende un niño y en diciembre todo dueño de perro en Colombia lo vive.	P2
B	¿Qué no puede comer mi perro en diciembre?	Orejeras	Pregunta de todas las casas en Navidad, con datos que la gente guarda.	P3, P4
C	¿Por qué mi gato duerme en la caja y no en la cama?	Cama trineo	Todo dueño de gato lo ha visto; la respuesta lleva directo al trineo.	P5, P6

IDEA	PREGUNTA	LLEVA A	POR QUÉ GANA	VIDEOS
D	¿Mi perro me extraña cuando me voy?	Comunidad (FONDO)	Emocional y universal. Video de comunidad (palabra FONDO).	P7
E	¿Disfrazar a mi perro es maltrato?	Disfraz	Polémico: la gente opina y se queda leyendo comentarios.	P9, P10
F	¿Gato o perro: cuál es mejor?	Comunidad (FONDO)	El debate más grande de las mascotas, actuado por Toffee y Galleta.	P11, P12
G	¿Cuántas horas duerme un gato?	Cama trineo	Dato curioso que sorprende; Toffee es la prueba viva.	P13, P14
H	¿Por qué los gatos tiran cosas de la mesa?	Comunidad (FONDO)	Es la frase de Toffee. Video de marca y comunidad.	P15
I	¿Debería prohibirse la pólvora?	Orejeras	El tema de diciembre en Colombia: efecto cotilla y polémica.	P17, P18
J	¿Qué le regalo a mi mascota en Navidad?	Disfraz	Pregunta común de noviembre que termina en el disfraz.	P19, P20
K	¿Por qué mi perro me sigue al baño?	Comunidad (FONDO)	Todos lo viven y les da risa. Video de comunidad.	P21
L	¿Se pueden llevar bien un perro y un gato?	Comunidad (FONDO)	Toffee y Galleta son la prueba. Video de marca.	P23, P24

Cómo subir cada video

Cuenta de creador

En Instagram usa cuenta de creador, no de empresa: la de empresa limita la música.

Estado de la cuenta

Configuración → Estado de la cuenta → "¿Puede recomendarse tu contenido?" tiene que estar en verde.

Máxima calidad

Configuración → Uso de datos y calidad multimedia → activa "Subir con la máxima calidad". Yo te entrego los videos en 1080p, no en 4K.

Publica a mano

No uses el programador nativo de Instagram (le quita alcance). Publica tú a la hora del plan. Si un día no puedes, usa Metricool.

Nada de tráfico de afuera

No compartas el enlace del video en grupos ni pidas likes. Eso confunde al algoritmo sobre a quién mostrarlo. Igual, nadie tiene que saber: perfecto.

Sin anuncios en la cuenta

No promociones los videos. Las cuentas con anuncios se "intoxican" y pierden alcance orgánico.

Nombre con palabra clave

En el campo Nombre: "Toffee y Galleta | gato y perro". El buscador lee ese campo (se puede cambiar cada 14 días).

Biografía con una promesa

"Toffee 🐱 y Galleta 🐶 · Lo que tu mascota haría si pudiera hablar · 🛷 soytoffee.store"

Cuentas sugeridas y ubicación

Activa "Sugerir cuenta a otros" y, si Instagram lo pide, pon Colombia como ubicación de la audiencia.

El mismo archivo en las 3 redes

Sube el archivo limpio que yo te mando a TikTok, Instagram y YouTube Shorts. Nunca descargues el de TikTok para subirlo a otra red: lleva marca de agua y lo castigan.

Las imágenes que necesitas

Están en el repositorio, en toffee/refs y toffee/refs/productos (la de Galleta con orejeras, en toffee/web/futurista). Cada prompt dice cuáles adjuntar y en qué orden: primero los personajes y al final el producto.

Revisión

Cada sábado me mandas las vistas y la retención. El domingo re-edito el que ganó, y la semana siguiente hacemos más de esa idea.

Los videos viejos

Quedan de reserva solo para un día de emergencia. El plan no los usa.

PROMPT

```
Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom). The video starts mid-action. 0-8s: Toffee sits upright on a sofa, falling asleep: his round head slowly drops, he opens his eyes with wide eyes and starts closing them again; ends in the same position as the first frame, seamless loop. Camera: static, eye level, close. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: a tiny sleepy breath. No speech, no music. The nightcap stays on Toffee's head the entire time. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom). The video starts mid-action. 0-8s: top-down close-up of Toffee's chubby paws kneading a cream knitted blanket, left-right, the pompom of his nightcap visible at the top; ends as the first frame, seamless loop. Camera: static, top-down. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: kneading sounds and a deep purr. No speech, no music. The nightcap stays on Toffee's head the entire time. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Reference images: one is Toffee, one is the product. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom). The product is the red sleigh-shaped pet bed from the reference image: plush red body, fluffy white raised trim, 'Merry Christmas' embroidery, red-and-white striped runners and a small rope. The video starts mid-action. 0-8s: morning: Toffee steps into the sleigh bed next to a big window, turns around once, flops down and looks at the camera as if starting a test. Camera: static, eye level. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: a soft thud, a purr. No speech, the voice is added later; characters do not move their mouths. No music. The nightcap stays on Toffee's head the entire time. The product looks exactly like its reference image and stays visible until the last frame. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom). The video starts mid-action. 0-4s: a big hollow carved pumpkin on a porch at dusk wobbles. 4-8s: Toffee's round face and nightcap pop up out of the top, as round as the pumpkin, and he blinks at the camera. Camera: static, low. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: soft wind, a pumpkin wobble. No speech, no music. The nightcap stays on Toffee's head the entire time. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom). The video starts mid-action. 0-8s: Toffee sits next to a small decorated Christmas tree with wrapped gifts, looks at the gifts, then at the microphone, thinking, tail tip moving. Camera: handheld wide 0.5x phone lens; a small handheld microphone enters from the bottom-right corner of the frame and points at the animal, like a street interview. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: soft ambience. No speech, the voice is added later; characters do not move their mouths. No music. The nightcap stays on Toffee's head the entire time. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. The microphone only ever points at Toffee; no people visible, at most a hand at the frame edge holding it. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Reference images: one is Galleta, one is the product. Galleta (the exact same dog from the reference image: scruffy wiry golden-brown Latin American criollo mutt, floppy ears, bushy eyebrows and beard, white chest and paws, navy blue bandana with a golden bone tag). The product is the green Christmas-tree dog costume from the reference image: green hooded cape with layered ruffled tiers, small colorful pom-poms, a white cord and a yellow star on the hood; it leaves the eyes and ears free. The video starts mid-action. 0-6s: a big decorated Christmas tree, nothing moves; Galleta in the costume is camouflaged at its base. 6-8s: his tail starts wagging and gives him away. Camera: static. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: a jingle at the end. No speech, no music. The bandana stays on Galleta the entire time. The product looks exactly like its reference image and stays visible until the last frame. The very first frame already shows Galleta's face clearly and in focus, easy to recognize on a phone screen. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.

Vertical 9:16 video, 8 seconds. One continuous shot, no cuts. Reference images: one is Toffee, one is Galleta. Toffee (the chubby round cream-caramel British Shorthair cat from the reference image, solid color, no stripes, big round green eyes, round cheeks, wearing a navy blue knitted nightcap with a drooping tip and a cream pompom) and Galleta (the exact same dog from the reference image: scruffy wiry golden-brown Latin American criollo mutt, floppy ears, bushy eyebrows and beard, white chest and paws, navy blue bandana with a golden bone tag). The video starts mid-action. 0-8s: Toffee and Galleta sleep curled together on a sofa; Toffee lifts his head and looks at the camera. Camera: handheld, close. Style: looks like a real phone video filmed at home, natural light, slightly imperfect handheld framing, photorealistic, real dense fur, realistic animal anatomy and expressions; not an ad, not cartoon. Sound design: soft breathing. No speech, the voice is added later; characters do not move their mouths. No music. The nightcap stays on Toffee's head the entire time. The bandana stays on Galleta the entire time. The very first frame already shows Toffee's face clearly and in focus, easy to recognize on a phone screen. Toffee and Galleta always stay separate and solid; they never pass through or merge into each other. No microphone, no people, no hands in this shot. No text, no letters, no logos, no watermark, no other animals.
