SOY TOFFEE · PLAN DE VIDEOS

7 días, *3 videos diarios*

Del sábado 24 al viernes 30 de octubre de 2026. Son 21 videos (49 tomas para generar en Google Flow con Omni Flash 1.1, a 720p y en vertical 9:16). Cada video está pensado para una red, pero **los 3 se suben en las 3 redes**, para ver qué funciona dónde.

Lo hice con tu estudio (Víctor Heras, los 27 videos virales y los que venden, y tus números), con lo que funciona en cada red y con el análisis de la cuenta de Chonk.

A · El chiste
Pensado para TikTok. Humor, una situación absurda, un giro. Corto (6–10 s), una sola toma, el final empalma con el inicio. Casi siempre sin voz.

B · El consejo
Pensado para Instagram. Soluciona un problema o es «esto es mi perro». Texto en pantalla. 16 s (2 tomas de 8 s), con voz.

C · La historia
Pensado para YouTube. «El diario de Galleta», por capítulos: inicio, problema, final. 24–32 s (3–4 tomas de 8 s), con voz. Título que la gente busca.

El calendario

	A · El chiste pensado para TikTok	B · El consejo pensado para Instagram	C · La historia pensado para YouTube

Cómo generar en Flow

1. Modelo **Omni Flash 1.1**, 720p, vertical 9:16, con la **duración que dice cada toma** (6, 8 o 10 s).
2. Añade las fotos de la toma como Ingredientes y pega el prompt **completo** (está en inglés porque Flow lo entiende mejor).
3. Genera 2 versiones de cada toma y quédate con la que tenga a Toffee y a Galleta más parecidos a las fotos.
4. Si una toma sale con el gorro raro, con dos gatos o con el perro cambiando de color, se repite: no la arregla la edición.

La voz de Toffee

- La pones tú, con tu voz de siempre. Flow solo pone el sonido del ambiente; todos los prompts le piden «sin voces» y que los animales tengan la boca cerrada (es **voz en off**, como la de Jake el perro).
- El guion de cada toma dura lo que la toma (unos 8 s). Si al leerlo no cabe, súbele un poquito la velocidad (1,1×) o mándamelo y lo ajusto.
- Los videos A no llevan voz (menos los de «Toffee trabaja en Colombia»): el sonido lo pone el **audio en tendencia que eliges en TikTok el día que publicas** (regla 6 de tu estudio).
- **Subtítulos de la voz en inglés** (los pongo yo); los textos grandes en pantalla, en español.

Al publicar (de tu estudio)

- **Horario (hora de Colombia):** 8:30 a. m. el chiste (A) · 12:30 p. m. la historia (C) · 7:30 p. m. el consejo (B). Desde la semana 2 rotamos el orden para comparar.
- Sube el **archivo limpio que yo te devuelvo** en las 3 redes. Nunca bajes el de TikTok para subirlo a otra red: lleva marca de agua y lo castigan.
- Instagram: cuenta de creador; publica tú a mano (el programador de Instagram le quita alcance) o con Metricool.
- Activa siempre la etiqueta de **contenido creado con IA**.
- Nada de fechas límite ni «últimas unidades». Las orejeras **amortiguan**: nunca decir que eliminan el ruido o curan el miedo.
- No compartas tus videos en grupos ni pidas likes; no pongas anuncios.

🎵 Audios en tendencia (revisado el 24-oct)

Los saqué de listas de tendencias de esta semana (Revid, Buffer, Metricool y que.es). TikTok no deja ver su lista oficial desde mi computador, así que **antes de publicar confirma en tu app** que el audio siga subiendo: en «Agregar sonido», mira que tenga muchos videos y, si aparece, la flecha de tendencia.

- **Ramalama (Bang Bang)** · Róisín Murphy: revelaciones y Halloween; es el más usado este mes.
- **we fell in love in october** · girl in red: suave, de otoño, para escenas tranquilas.
- **Hello, October** · Tung Tulip: de los más usados a mitad de mes.
- **Chopin** · RYOpianoforte: piano dramático, sube rápido.
- **Sey Mami** · Cinco Suave: de los que más suben esta semana.
- **Halloween ・ cute horror song** · PeriTune: terror tierno, hasta el 31.

Truco para buscarlos tú mismo: en el celular, abre el TikTok Creative Center (ads.tiktok.com → Creative Center → Canciones), elige región **Colombia** y «últimos 7 días». Usa uno que esté subiendo, no uno que ya bajó.

Respuestas a las palabras clave (cópialas como Toffee)

> **CALMA:** ¡Humano! Aquí Toffee 😺 Las orejeras de Galleta están en soytoffee.store (el enlace está en mi perfil). Envío gratis y pagas con PSE, Nequi o tarjeta en cuotas. Y el 3 % va a mi marrano para perritos de la calle 🐷 ¿Desde qué país me escribes?

> **ÁRBOL:** ¡Humano! Aquí Toffee 😺 El disfraz de árbol está en soytoffee.store (el enlace está en mi perfil). Es para mascotas de 1,5 a 7,5 kg. Envío gratis y pagas con PSE, Nequi o en cuotas 🎄 ¿Desde qué país me escribes?

> **TRINEO:** ¡Humano! Aquí Toffee 😺 Mi cama trineo está en soytoffee.store (el enlace está en mi perfil). Mide 50 × 38 × 26 cm y tiene bordes altos, como me gusta. Envío gratis y pagas con PSE, Nequi o en cuotas 🛷 ¿Desde qué país me escribes?

Lo que aprendí de Chonk (@fatchonkywizardcat)

Revisé el perfil y sus 2 videos más vistos cuadro por cuadro, con sus números reales (sacados de TikTok el 23-oct). **Ojo:** TikTok no deja ver la lista de sus 93 videos sin iniciar sesión, así que no pude revisarlos todos. Lo que sí se ve en las búsquedas públicas de TikTok: hace bailes («chonk dance», «wiggle») y una serie por capítulos, «Tales of Chonk» (TikTok · wizard cat).

La cámara está abajo mirando hacia arriba; el dueño le toma las patitas y la cara se acerca al lente; la cámara gira. Una sola toma, sin texto y sin voz.

Video 2 · «hiii friends! My name is CHONK👋» · 5-oct
5 M vistas · 756 mil likes · 429 mil compartidos · 87 mil guardados · 8 segundos.

Cámara en el piso: el gato saluda con la pata al lente, con un sticker «hallo👋» que gira con la cámara; el teléfono «se cae», la cara queda al revés («hiii👋») y termina en la misma cara del inicio. Se repite solo.

Lo que tomamos para Toffee

1. **Su look es casi el de Toffee** (gato crema, redondo, con gorro azul oscuro) y llegó a 159 mil en 3 semanas. Eso confirma que el look de Toffee gusta. Pero **no lo copiamos**: Toffee usa gorro de dormir (no de mago), habla español, vive en Colombia, tiene a Galleta y una causa. Eso es lo que Chonk no tiene.
2. **Cámara al ras del piso o pegada a la cara**, y el gato que toca el lente: se siente como si fuera tu gato. Lo usan los videos A del día 1 y del día 3.
3. **6 a 8 segundos, una toma, el final igual al inicio.** Todos los videos A son así.
4. **Sin voz y con una palabra en pantalla** como sticker («hola, humano 👋», «lunes.»).
5. **Descripción corta en primera persona y pocos hashtags.** Chonk escribe como si el gato hablara y usa 3 hashtags. Tu estudio dice tercera persona; por eso probamos las dos: los A van en primera persona (como Chonk) y los B y C en tercera (como dice tu estudio). En una semana vemos cuál gana.
6. **Ternura que se comparte:** cachetes contra el lente, patitas, ojos grandes. Su mejor video tiene 16 de cada 100 compartiendo: es lo que más empuja.
7. **Publica mucho:** unos 4 videos al día. Tu plan de 3 diarios va en la misma línea.

Día 1 · Sábado 24 de octubre

Día 1 · Video A — **Pensado para TikTok · El chiste**

«Hola, humano»

8 s · 1 toma · Voz de Toffee: **NO** · Palabra: **TRINEO**

Por qué funciona: Formato Chonk: cámara en el piso, la cara llena la pantalla, la pata toca el lente y el final empalma con el inicio. Tu video de Toffee moviendo la cabecita fue el de mejor retención.

Vertical 9:16, 8 seconds, 720p, realistic smartphone home video,
handheld, natural home lighting, realistic physics,
photorealistic (not cartoon, not 3D). Extreme low-angle first-
person shot: the camera itself lies on the wooden floor of a cozy
Colombian living room looking straight up, ultra-wide 0.5x lens;
we see the ceiling and a hanging lamp behind the cat. The viewer
IS the camera: no phone, no screen and no device visible anywhere
in the frame. From the very first frame, the round face of the
chubby round cream-caramel British Shorthair cat from the
reference (solid color, no stripes, very round face with big
cheeks, small ears, big round green eyes with very dilated
pupils) wearing his navy blue knitted nightcap with a drooping
tip and a cream pompom fills the upper half of the frame, looking
down into the lens with huge curious eyes. He slowly lowers his
face until his nose almost touches the lens, then reaches down
and taps the lens itself twice with one soft round paw (the paw
pad fills the frame), tilts his head, then lifts his face back to
exactly the same position as in the first frame (seamless loop).
One single continuous shot, no cuts. The cat looks exactly like
the reference in every frame; only one cat, no other animals. The
cat keeps his navy nightcap on the whole time. Natural ambient
sound only (quiet room, soft paw taps on the lens), no voices, no
talking, no music. Avoid: on-screen text, subtitles, logos,
watermark, cartoon, 3D render, extra paws, extra animals,
morphing, changing colors, cat without nightcap.

Vertical 9:16, 8 seconds, 720p, realistic smartphone home video,
handheld, natural home lighting, realistic physics,
photorealistic (not cartoon, not 3D). Night in a cozy Latin
American living room; colorful fireworks flash through the
window. The camera is placed on the floor UNDER a wooden dining
table, looking at the dog, who is also under the table: the dark
underside of the table top is visible like a low ceiling at the
top of the frame, and chair legs frame the dog on both sides. The
dog, the scruffy golden-brown criollo dog from the reference
(thin and long-legged, wiry messy fur, bushy eyebrows and a
little beard, floppy half-folded ears, white chest and paws, big
nervous brown eyes) wearing his navy blue bandana with a golden
bone-shaped tag, lies flat and pressed against the floor in the
far corner under the table, terrified, visibly trembling and
shaking the whole time, ears flat back against his head, tail
tucked, eyes wide and scared, panting. He stays in exactly the
same hiding spot for the whole clip: he does not stand up, does
not sit up, does not walk. His scared face is close to the camera
from the first frame; each colorful flash lights his face.
Between the chair legs, in the background, the round cream legs
and the nightcap pompom of the chubby round cream-caramel British
Shorthair cat from the reference (solid color, no stripes, very
round face with big cheeks, small ears, big round green eyes with
very dilated pupils) wearing his navy blue knitted nightcap with
a drooping tip and a cream pompom are visible on a chair, calm.
Slow, small handheld push-in. The cat and the dog look exactly
like the references in every frame; only one cat and one dog. The
cat keeps his navy nightcap on the whole time. The animals'
mouths stay closed; nobody talks (a voice-over is added later).
Natural ambient sound only (distant fireworks), no voices, no
talking, no music. Avoid: on-screen text, subtitles, logos,
watermark, cartoon, 3D render, extra paws, extra animals,
morphing, changing colors, cat without nightcap, calm dog, dog
sitting, dog standing, dog walking toward the camera, dog outside
the table, relaxed ears.

little beard, floppy half-folded ears, white chest and paws, big
nervous brown eyes) wearing his navy blue bandana with a golden
bone-shaped tag lies calm and relaxed on a worn patterned sofa
wearing the dark gray padded ear muff HOOD from the reference
(exact copy: one piece of thick dark gray fabric that wraps over
the top and back of the head like a snood and completely covers
BOTH ears; the ears are tucked inside and NOT visible; thin black
elastic trim around the face opening; velcro strap under the
chin; muzzle and eyes free; it is NOT headphones, NOT a headband
and NOT straps); the dark gray hood clearly covers both of his
ears, which are hidden inside it; his eyes slowly close. From the
first frame, the chubby round cream-caramel British Shorthair cat
from the reference (solid color, no stripes, very round face with
big cheeks, small ears, big round green eyes with very dilated
pupils) wearing his navy blue knitted nightcap with a drooping
tip and a cream pompom is already lying curled up against the
dog's side on the sofa, facing the camera; near the end the cat
looks straight into the camera and slowly blinks. Medium shot,
both animals fully visible, gentle handheld camera. The cat and
the dog look exactly like the references in every frame; only one
cat and one dog. The cat keeps his navy nightcap on the whole
time. The animals' mouths stay closed; nobody talks (a voice-over

Vertical 9:16, 8 seconds, 720p, realistic smartphone home video,
handheld, natural home lighting, realistic physics,
photorealistic (not cartoon, not 3D). Colombian New Year's Eve
dinner table at night: a plate with twelve green grapes, glasses,
a small bowl of lentils, yellow decorations. From the first
frame: the chubby round cream-caramel British Shorthair cat from
the reference (solid color, no stripes, very round face with big
cheeks, small ears, big round green eyes with very dilated
pupils) wearing his navy blue knitted nightcap with a drooping
tip and a cream pompom sits on the table next to the grapes,
looks into the camera, then deliberately pushes the plate of
grapes with his paw until it slides off the edge of the table.
the scruffy golden-brown criollo dog from the reference (thin and
long-legged, wiry messy fur, bushy eyebrows and a little beard,
floppy half-folded ears, white chest and paws, big nervous brown
eyes) wearing his navy blue bandana with a golden bone-shaped tag
sits on the floor, watching, confused. The cat and the dog look
exactly like the references in every frame; only one cat and one
dog. The cat keeps his navy nightcap on the whole time. The
animals' mouths stay closed; nobody talks (a voice-over is added
later). Natural ambient sound only (plate sliding, grapes falling
on the floor, distant celebration), no voices, no talking, no
music. Avoid: on-screen text, subtitles, logos, watermark,
cartoon, 3D render, extra paws, extra animals, morphing, changing
colors, cat without nightcap.

knitted nightcap with a drooping tip and a cream pompom inside
the red plush sleigh-shaped pet bed from the reference (exact
copy: red velvet body with a high curved back, white fluffy faux-
fur trim on the edges, white snowflake prints, black runners),
curled up in a perfect ball, chin resting on the high padded
fluffy edge, eyes slowly closing. The camera slowly moves a
little around the bed. The cat looks exactly like the reference
in every frame; only one cat, no other animals. The cat keeps his
navy nightcap on the whole time. The animals' mouths stay closed;
nobody talks (a voice-over is added later). Natural ambient sound
only (soft purring), no voices, no talking, no music. Avoid: on-
screen text, subtitles, logos, watermark, cartoon, 3D render,
extra paws, extra animals, morphing, changing colors, cat without
nightcap.

🎵 **AUDIO EN TIKTOK**

Ninguno: lleva la voz de Toffee. Si quieres, una música suave de fondo muy bajita (5–10 %).

Cómo me mandas los clips para editar

Ponles este nombre (así sé cuál es cuál):

- Video A: **D1-A.mp4** (una sola toma).
- Videos B y C: **D1-B-1.mp4, D1-B-2.mp4**… y **D1-C-1.mp4** hasta **D1-C-4.mp4**.
- La voz: **D1-B-voz.mp3** y **D1-C-voz.mp3** (puede ser un solo audio por video, leyendo todo el guion seguido).

Lo que hago yo con cada video

1. Uno las tomas y recorto lo que sobra (el inicio lento, los cuadros raros del final).
2. Pongo la voz encima y bajo el sonido de Flow para que se entienda.
3. Subtítulos grandes y legibles, y el texto en pantalla que dice cada toma, con los colores de Toffee.
4. Mejoro la calidad: lo paso de 720p a **1080 × 1920** (lo que piden las redes), con más nitidez y menos ruido. Ojo: mejora lo que hay, no inventa detalles que Flow no generó.
5. Te devuelvo **D1-A-final.mp4**, **D1-B-final.mp4** y **D1-C-final.mp4**, listos para subir a las 3 redes.

Cómo vamos a medir (cada noche, 2 minutos; el día 7 decidimos)

Red	Número clave	Dónde lo ves
TikTok	% que lo vio completo y tiempo promedio	Video → Estadísticas
Instagram	Veces compartido y guardados	Reel → Ver estadísticas
YouTube	«Lo vieron» contra «Lo deslizaron»	YouTube Studio → Contenido → el Short
Las 3	Comentarios con CALMA, ÁRBOL o TRINEO	Comentarios

Anota cuál de los 3 videos (A, B o C) ganó en cada red. Con eso, la semana 2 hacemos más del que ganó (tu estudio: el 80 % no funciona; se repite el 20 % que sí, con otro gancho).
