El viaje de Toffee · Estudio + Sección 1

Vlogs 2 al 15 · 26 de octubre al 8 de noviembre de 2026 · Halloween → Día de Muertos → América

Cómo usar este PDF (igual que el vlog 1)

1. **Antes de cada vlog**, si tiene un personaje nuevo, haz primero su ficha en Nano Banana Pro (página «Personajes nuevos») y guárdala.
2. Cada toma: **Omni 1.1 Flash · 9:16 · los segundos que dice**. Sube las fotos que dice (TOFFEE = TOFFEE-viajero.jpg, GALLETA = GALLETA-viajero.jpg, TRINEO = REF-trineo-rojo.jpg, OREJERAS = REF-orejeras-gris.jpg, DISFRAZ = REF-disfraz-verde.jpg).
3. Si dice **Primer cuadro**, mándame la toma anterior y yo te saco el último cuadro.
4. Copia el prompt completo. Si la toma no sale como dice, **se repite** (mándamela y te digo qué falló).
5. Voces: genera en ElevenLabs **todas las frases de Toffee de un vlog juntas** (cuadro «Voces de Toffee» al final de cada vlog) y aparte las de cada personaje con su voz fija.
6. Me mandas las tomas aprobadas + las voces y yo edito: subtítulos en español, título arriba, cortes, boca sincronizada.

Por qué Gnomo Palomo y El Loco Blanco son tan virales (y cómo usarlo en Toffee)

Estudio del 25-oct-2026. Analicé los 19 videos que mandó Jay: los descargué y saqué sus números, conté los cortes, transcribí todo lo que dicen y revisé los cuadros.

1. Los números

Gnomo Palomo (11 de 12 videos; uno está bloqueado por edad)

Video	Fecha	Duración	Vistas	Cortes	Compartidos
Polvos mágicos	jun-2025	77 s	**22,7 M**	15 (1 cada 4,8 s)	590 mil

El Loco Blanco (7 videos)

Video	Duración	Vistas	Compartidos

La selva y el mono Juanpi	64 s	1,3 M	23 mil
Pulseada con un mono	30 s	1,5 M	16 mil

Lo que dicen los números:

- **Lo más visto es lo más compartido.** Los videos de 15 a 47 millones de vistas tienen entre 300 mil y 1,5 millones de compartidos. Se vuelven virales porque la gente se los manda a alguien.
- **Gnomo empezó a bajar cuando dejó su fórmula.** Sus aventuras con un objeto mágico pasaron de 15 a 22 millones de vistas. Cuando probó otros formatos (documental del pingüino, house tour, política), bajó a entre 0,5 y 3 millones. Además publicaba cada vez menos: casi un video por mes.
- **El Loco Blanco hace videos cortos (18 a 72 s) y los más vistos son los más cortos.** Cuenta un solo momento loco, de golpe.

2. El gancho: los primeros 3 segundos

Gnomo Palomo:

1. **El primer cuadro ya muestra lo prometido.** Está mordiendo la fruta, echándole polvos a la seta o abriendo el chocolate del ticket. No hay presentación antes.
2. **Arriba, un texto que nombra la promesa**, con la palabra clave en color: «Probando una **fruta del diablo** 🔥», «Probando la **Seta Turbo Iris** con Polvos Mágicos», «Me toca el Ticket Dorado y voy a la fábrica de **Santa Claus**».
3. **La primera frase en voz es la misma promesa.** Se oye y se lee a la vez.
4. **A veces empieza por el final** (el momento más loco) y luego retrocede: en la fruta del diablo pasa a «Vlog nº 7».
5. **Mete los comentarios en pantalla:** «Me habéis bombardeado en los comentarios con la fruta del diablo». La gente siente que el video se hizo porque ella lo pidió.

El Loco Blanco:

1. **Empieza en plena acción y con un grito** («¡WOA! ¡WOA!», un choque, un oso).
2. **Saludo fijo:** «¿Qué onda? Acá el Loco Blanco». Se reconoce en un segundo.
3. **Cada video promete un reto sencillo:** «Me dijeron que Red Bull te da alas, vamos a ver si es cierto».

3. Por qué la gente lo comparte

	Gnomo Palomo	El Loco Blanco
Personaje	Abuelo gnomo con GoPro en la gorra, malhablado y tierno	Gorila blanco «barrabrava» argentino, chulo, con palo de selfie
Muletillas	«mis locos», «mis loquitos», «¡ostias!», «tengo hambre»	«¿qué onda?», «boludo», «papá», «corneta», «gente»
Estructura	Consigue algo mágico → «vamos a casa a probarlo» → se sale de control, cada vez peor → aparece un personaje conocido → cierre con suspenso	Varias locuras seguidas en un solo minuto: pelea con el oso, se encuentra un vehículo, vuela en helicóptero
Personajes que vuelven	Peter Chunk (el vendedor), Alzheimerdinger, Keko (la seta), el mercado negro	El oso Loco Marrón, «Anuel» (su mascota), el mono Juanpi
Humor	Contraste: abuelo tierno diciendo groserías, chistes de adulto	Chulería: le pega a un oso y dice «no controlo mi fuerza»
Corazón	El niño elfo que nunca recibió un regalo	Poco; es puro humor
Cultura pop	Fruta del diablo (One Piece), Naruto, Mordor, Hogwarts, Aitana, Minecraft, Pokémon	Red Bull, influencers argentinos, saludos a creadores
Comunidad	«Ponedme en los comentarios qué queréis ver»	«Recomienden bailes», «saludo al Pimpe»
Cómo gana plata	«Si queréis saber cómo hago estos vídeos, mirad el enlace de mi perfil» (vende su método) y canciones con artistas	Camisetas: «la conseguís en elocoblanco.com» dentro de la historia

Lo que comparten los dos:

1. **Un personaje que no existe pero se siente real.** Se graba a sí mismo como un influencer cualquiera, con cámara en mano o en la cabeza.
2. **Lo absurdo contado con toda la seriedad.** Un gnomo prueba drogas mágicas y un gorila hace pesca deportiva.
3. **Siempre la misma estructura y los mismos personajes.** El que vuelve se siente de adentro y quiere ver el siguiente capítulo.
4. **El público decide el próximo video** desde los comentarios.
5. **Venden dentro de la historia sin que parezca anuncio.** La camiseta aparece en la nieve; el método está «en el perfil».

4. Cómo editan

- **Un corte cada 3,7 a 5 segundos** en los videos largos de Gnomo, y hasta cada 1,7 s en el de multiversos. Ningún plano dura más de 8 s.
- **El Loco Blanco** corta mucho menos. Se ve como un video casero continuo: el «clip del celular» es parte del chiste.
- **Tipos de toma (Gnomo):**
  - Selfie con la cámara en la cabeza.
  - Primera persona (se ven sus manos).
  - Dron sobre paisajes enormes.
  - Caídas en primera persona por portales.
  - Primer plano exagerado de la cara gritando.
- **Paisajes de película, uno distinto en cada video:** cueva de setas azules que brillan, tren sobre el mar, aurora boreal, Hogwarts, ciudad de neón.
- **Subtítulos de 1 a 3 palabras**, blancos con borde, en el centro, al ritmo de la voz. **Título arriba** solo en los primeros segundos, con una palabra en color.
- **Sonido:** música de fondo baja y efectos (golpes, gritos, «whoosh» en los cortes).
- **Otros personajes que hablan** con la boca sincronizada y una voz propia cada uno.
- **Final:** «Sígueme para no perderte el próximo vlog» o «parte 1», para dejar la duda.

5. ¿Usar personajes famosos (Toy Story, Hora de Aventura, Rick y Morty, Los Simpson)?

Mi recomendación: no con sus nombres ni sus diseños.

- **Son marcas con dueño** (Disney/Pixar, Warner, Fox). En 2026 Disney, Warner y Paramount mandaron cartas legales a ByteDance (la dueña de TikTok) por videos de IA con sus personajes, y ByteDance aceptó ponerles freno (Gigazine, Law Commentary).
- **Google Flow suele bloquear prompts con personajes famosos.** Después de la carta de Disney empezó a bloquear sus personajes (Vitrina). Perderías créditos y tiempo.
- **Nosotros vendemos.** Gnomo se arriesga con su propia cuenta. Toffee es la cara de una tienda: si TikTok baja videos o da advertencias, se pierde la cuenta que vende. Y las marcas que algún día te paguen por una colaboración no quieren problemas de derechos.

Cómo aprovechar lo mismo, sin riesgo:

1. **Personajes de dominio público** (ya no tienen dueño): Drácula, el monstruo de Frankenstein, la Momia, el Jinete sin cabeza, Pinocho y Alicia en su versión de libro.
2. **Leyendas latinas, que son de todos:** la Lechuza bruja, el Chupacabras, la Llorona, el Silbón, el Mohán, la Patasola, el Cucuy. **Además encantan en Colombia y México**, que son nuestros mercados.
3. **Un «guiño» sin nombre ni diseño:** «un vaquero de juguete con sombrero», «un abuelo científico loco con bata». Se parece a la idea, pero no es el personaje.
4. **Tendencias y memes del momento:** sonidos de moda, retos y frases virales. Eso sí se puede, y es justo lo que hacen ellos.

6. Música propia

- Gnomo sacó la canción «SUPERGORDITA» con Aitana, y el Loco Blanco usa música de su tienda. Una canción pegajosa del personaje se vuelve **sonido** en TikTok: si otros la usan, cada video de ellos te hace publicidad.

- Para Toffee hice **«La Noche del Miau»** para Halloween (vlog 7). Se puede hacer en **Suno**. Ojo: para usarla en videos que dan plata, Suno pide un plan de pago; con el plan gratis, la canción no es tuya.
- Cuando estés en el editor de TikTok, súbela como **«sonido original de Soy Toffee»**.

7. Cómo queda la estrategia para Toffee

Lo que ya tenemos (igual que ellos):

- Personaje con cámara en el gorro.
- Formato vlog.
- Subtítulos cortos y título arriba.
- Cortes cada 3 a 5 s.
- Una misión con corazón.

Lo que agrego desde ahora:

1. **Cada vlog promete algo en el primer cuadro.** Lo pongo en el título de arriba y en la primera frase: «Probando una **poción de bruja** 🧪», «Un **ovni** se llevó a Galleta 🛸». Cada vlog trae marcada su toma **GANCHO**, la que va primero en la edición aunque pase después en la historia.
2. **Una estructura fija, como la de Gnomo:**
3. Promesa.
4. Llegada a un lugar increíble.
5. Personaje nuevo.
6. El caos crece.
7. Un momento de corazón: un animal para la lista de regalos.
8. Pregunta a los comentarios.
9. Final con suspenso.
10. **Frases fijas de Toffee:** «Humanos...», «Galleta no sabe...», «Número X de la lista», «Vlog número...». Se repiten para que el público las reconozca.
11. **Personajes que vuelven:** Doña Lechuza (la guía), Calabacín, el Conde Murciélago, el Chupacabras y Paca. Cada uno tiene su foto y su voz fija.
12. **Paisajes únicos en cada vlog:**
13. Bosque de calabazas gigantes.
14. Castillo con luna llena.
15. Mercado flotante de brujas.
16. Pantano de luciérnagas moradas.
17. Puente de flores del Día de Muertos.
18. Valle de Cocora.
19. Machu Picchu.
20. Desierto de Atacama.
21. Arena de lucha libre.
22. Barco de hielo en las nubes.
23. **El público manda:** al final de cada vlog, «díganme en los comentarios...». Si piden algo, la siguiente sección se cambia.
24. **Temporadas:**
25. Halloween hasta el 31-oct.
26. Día de Muertos el 2-nov (México).
27. Gira por nuestros países en noviembre.
28. Polo Norte en diciembre.
29. **Los productos dentro de la historia, como la camiseta del Loco Blanco:**

30. La cama trineo es el vehículo.
31. Galleta usa las orejeras en la fiesta de los murciélagos («amortiguan el ruido», nada médico).
32. Galleta gana el concurso de Halloween disfrazado de árbol de Navidad.

8. ¿Cuántos videos al día?

Mi recomendación: 1 vlog al día, bien hecho, y 1 recorte.

- Ninguno de los dos hace 3 videos distintos al día. Gnomo llegó a casi un millón de seguidores con **21 videos**. Lo que los hizo crecer fue que cada video era muy bueno, no la cantidad.
- Un vlog son unas 8 tomas, más las repeticiones. Hacer 3 al día con esa calidad no da.
- **Plan diario:**
  - **12:30 p. m.:** el vlog del día, en TikTok, Reels y Shorts.
  - **7:30 p. m.:** un recorte de 10 a 20 s con el mejor momento, sin generar nada nuevo. Por ejemplo la escupida de la alpaca o el ovni llevándose a Galleta. Es el formato corto del Loco Blanco.
- **YouTube largo:** cada domingo, **la recopilación de la semana**. Así consiguió Gnomo su video más visto en YouTube (1,4 M).

9. El viaje hasta el 31 de diciembre (en secciones de 14 vlogs)

Sección	Fechas	Tema
1 (prompts listos)	26-oct → 8-nov	Valle de Octubre: Halloween y los 5 cascabeles. Día de Muertos. Colombia, Perú, Chile y México con el mapa encantado
2	9-nov → 22-nov	El barco de hielo y los animales que ayudan. Estados Unidos: Acción de Gracias, con un pavo que no se quiere dejar comer
3	23-nov → 6-dic	Black Friday (viernes 27). Rumbo al norte: Canadá, auroras, el pueblo de los renos
4	7-dic → 20-dic	Velitas (7-dic). Llegada al Polo Norte y el taller de Santa, distinto al de Gnomo: aquí lo atienden los animales
5	21-dic → 31-dic	Toffee le entrega a Santa la lista. Entrega real de regalos el 24. Pólvora del 31 con las orejeras. Año viejo

Las secciones 2 a 5 se escriben cuando termine cada una, según lo que pida el público.

Primer cuadro: Último cuadro de la toma 9c del vlog 1

```
Vertical 9:16, 6 seconds. Photorealistic smartphone video, normal lens (no fisheye, no vignette, no dark corners), sharp, natural colors, realistic physics. Continue exactly from the first frame: same snowy forest at night, same sleigh, same cat and dog. Static camera. The cat slowly leans forward toward the dark trees, scared, ears flat; the dog hides behind the sleigh rim. A warm lantern light slowly appears between the trees. Exactly one cat and one dog for the whole video, identical to the references; no other animals appear; the cat's whole head, nightcap and camera always in frame; the dog never speaks. No one speaks; only wind. No phone, no selfie stick, no text, no music.

The owl says in Latin American Spanish, in an old, raspy, warm grandmother voice: "¡Por fin! Llevo tres siglos esperando visitas." Her beak moves in sync with every word. Exactly one owl for the whole video, identical to the references; no other animals appear; the cat's whole head, nightcap and camera always in frame; the dog never speaks. Only the owl speaks, with wind in the background. No phone, no selfie stick, no text, no music.

Canción del vlog 7: «La Noche del Miau»

```
La Noche del Miau (canción de Halloween de Toffee)
Para Suno: estilo «reggaetón infantil de Halloween, divertido, coro pegajoso, voces de grupo, 100 BPM,
español latino».
(Ojo: para usarla en videos que generan dinero, Suno pide un plan de pago; con el plan gratis la
canción no es tuya.)

[Intro]
¡Miau! ¡Miau! Es la noche del miau…

[Verso 1]
Se cayó mi trineo en un valle sin sol,
una lechuza bruja con lentes me habló.
Una calabaza le tiene miedo a la oscuridad,
y un vampiro chiquito solo toma jugo de mora, ¡qué maldad!

[Coro]
Es la noche del miau, miau, miau,
nadie duerme en el valle, ¡guau, guau!
Si te asustas, ponte a bailar,
que el miedo se va si te ponés a saltar.

[Verso 2]
Galleta se disfrazó de árbol de Navidad,
y los monstruos gritaron: «¡Qué cosa tan fatal!»
Cinco cascabeles para volver a volar,
todos los animales merecen un regalo… ¡y ya!

[Coro x2]

[Final]
¡Miau! (hablado, Toffee) «Feliz Halloween, humanos.»
